

James Murray CPP - Senior Security Advisor, Neptune P2P Group

James after 22 years of service left the Special Boat Service in 1998 as a Warrant officer and spent 4 years as an Officer training and mentoring the UAE's Special Maritime Operations Division. After this James became involved in the development and implementation of the International Ship & Port Facility (ISPS) Code since its inception by the International Maritime Organization (IMO) in December 2002 and coming into effect across the maritime industry on 01st June 2004. Developing and delivering maritime security training courses for Lloyds Register globally, to conducting IMO ISPS Needs Assessment missions in Nigeria, Angola, Mauritius, Gambia, and Trinidad & Tobago. As a member of the IMO "panel of experts" he has presented train the trainer courses in Latvia and Beirut, assisting in the establishment of Maritime Response Coordinating Centres (MRCC) in West Africa. James has been, and continues to, consult for major oil companies and Government Agencies in establishing maritime security processes within their port facilities and aboard their ships and offshore assets throughout the Middle East, predominately in Kuwait, Qatar, UAE, Oman and Saudi Arabia. James is currently assisting in the establishment of an Integrated Security System for the Port of Chittagong in Bangladesh and recently involved in compiling the maritime security plan for an offshore LNG project in Northern Mozambique.
