

**NEPTUNE
P2P GROUP**

**CYBER SECURITY AWARENESS
TRAINING WILL HELP PROTECT YOUR
COMPANY'S MONEY AND REPUTATION**

Don't risk your business or reputation

In 2017, a well-known shipping company suffered a cyber-attack, taking their tracking operations and logistics offline for 3 days. Almost 50,000 endpoints and thousands of applications and servers across 600 sites in 130 countries were affected. There was a suggested loss of up to \$300 million.

Address your Cyber Security vulnerabilities

Tackling your Cyber Security weaknesses will enable you to:

- Mitigate against data breaches and cyber attacks
- Reduce vulnerabilities and subsequent risk
- Operate within IMO Guidelines

**Educate your crew and port staff with a
Cyber Security Awareness training programme**

95% of successful breaches are down to human error. Building awareness and a more cyber secure culture is key to reducing the human risk factor of cyber risk.

- **Build a cyber secure culture** through Security Awareness Training
- **Automate** training deployment to all crew over 12 months
- **Test** crew members awareness through simulated phishing
- **Pull reports** to track crew engagement, progress and performance

IMO Guidelines May 2021 highlight that “Regulations and laws are being brought in that will require owners, operators and managers to consider cyber risks, such as the IMO Guidelines on Maritime Cyber Risk Management (ResolutionMSC.428(98)) and the IACS Unified requirements on Cyber safety, E26 and E27.” E26 aims to ensure that the equipment onboard and ashore is updated and covers five key aspects, equipment identification, protection, attack detection, response and recovery. E27 aims to ensure system integrity is secured and hardened by third-party equipment suppliers.

PREVENTION BY PROTECTION

Neptune’s record of success speaks for itself. We are proud to have protected and supported organisations across the world with our security and risk management services. No matter where you are, or how complex your requirement is, our 24/7 team of security experts are ready to safeguard you and your business.
