

TRAVEL RISK MANAGEMENT (TRM)

How safe are your employees when travelling on business?

Are you providing the appropriate Duty of Care?

With employees increasingly travelling regionally and internationally, their safety is no longer a “nice to have” — it is a legal and moral obligation. While many organisations apply controls for travel to hostile environments, fewer consider the risks faced by staff travelling to unfamiliar but seemingly low-risk destinations.

Recent cases — including a British businessman who was murdered during a business trip to Nairobi, and an NGO fined for negligence after an employee infected in Cambodia died from malaria - highlight the consequences of inadequate travel risk management.

Neptune P2P Group supports organisations with end-to-end Travel Risk Management solutions, including:

Market Entry and Mission Enablement. Initial security risk assessments and risk management plans to support day-to-day operations, visitors, and internal travel.

TRM Strategy, Policy and Procedures. Bespoke travel risk management frameworks with clear processes and management oversight.

Security Intelligence. Pre-deployment location security briefs and dynamic updates.

Training. We can provide the following Highfield International-accredited training:

- **Security Awareness in Foreign Environments (SAFE)** course for employees travelling to unfamiliar locations, delivered fully automated/self-paced online.
- **Hostile Environment Awareness Training (HEAT)** for employees travelling to semi-permissive or more hostile locations, delivered in person through practical scenarios.
- **Crisis Management training** for security departments and/or the c-suite.

Travel Risk Management App. Real-time intelligence, traveler monitoring, SOS alert, and emergency response.

Emergency Response and Crisis Management. Neptune’s 24/7/365 Operations Centre provides both an immediate Emergency Response service as well as a Crisis Management capability.

Air, land, and sea based evacuations. Neptune employs a network of trusted partners that we collaborate with to enable air, land and sea (or a combination of each) evacuations from challenging security environments. These range from simple airspace closures (where normal medical evacuations cannot be guaranteed) to locations of rising tensions or unforeseen instability and hostilities.

WHO WE ARE

Neptune P2P Group is an internationally renowned private security company offering security risk management and maritime security. It is owned and operated by former British special military unit officers and operators. Established in 2009 "Prevention by Protection" is at our core, supporting clients in both maritime and land-based risk management with its highly experienced team, industry knowledge, proprietary technology, and agility.

OUR MISSION

Neptune P2P Group's mission is to safeguard business operations, their people, their assets, and their reputation worldwide within unfamiliar, semi-permissive and high-risk maritime and land-based environments.

WHY USE NEPTUNE P2P GROUP?

Neptune are the thought leaders in security risk consultancy: moving beyond the likes of the ISPS Code and ISO 31000 with wider international best practice, and a blend of knowledge and experience. We have strategic knowledge and reach coupled with the on ground tactical experience others crave for rather than consultancies solely based on academic theories. Our standards are high and we care. We are client centric – we deliver what you actually require rather than off the shelf solutions – we are bespoke to your needs.

COMPLIANCE ACCREDITATION

Neptune P2P Group is certified to the following international standards: ISO9001 (Quality Management Systems), ISO 14001 (Environmental Management Systems), ISO45001 (Occupational H&S Management Systems), ISO28000 (Supply Chain Management Systems), ISO28007 (Maritime Security Management Systems) and employs the principles of ISO31000 (Risk Management), ISO28000:2022 (Security and Resilience -Security Management Systems), and ISO 22301 (Security and Resilience - Business Continuity Management Systems), ISO 31030:2021 (Managing Travel Risks), and BS11200 (Crisis Management). We also hold Cyber Essentials Plus certification.
