

PORT FACILITY SECURITY SERVICES

Neptune P2P Group specialises in ISPS Code related security assessments and audits, the development of security plans, and the delivery of associated training and exercises. Building on the extensive experience Neptune has developed since 2009 in Port Facility (and wider) security, we use the ISPS Code as the security baseline while integrating international best practice, security converge of your physical, technical and information security requirements – incorporating HSE (inc. Fire), emergency response and digital integration too.

Our range of services vary from assisting in the development of government-level maritime domain security strategies and policies, to conducting Port Facility Security Assessments and Plans, to exercising the plans and training Port Facility Security Officers, and managing all aspects of port safety and security - demonstrating a truly comprehensive approach.

Our Port Facility Security services specialists can deliver:

- Initial (and auditing) Port Facility Security Assessments (PFSA) and subsequent Port Facility Security Plans (PFSP), including PFSP briefing, training, drills and exercises, conducted in tandem with the port security team.
- Our PFSA also provides international best practice advice including security convergence between the physical, technical and information (including cyber) security domains – while also incorporating HSE (inc. Fire), emergency response and digital integration too.
- Business Continuity and Resilience. Linked to the PFSP, we can develop, if required, or validate existing contingency plans.
- Port Facility Security Officer (PFSO), Persons Designated Security Duties (PDSD) and General Security Awareness (GSA) training in accordance with the ISPS Code as a UK Department of Transport accredited provider.
- Crisis Management and Emergency Response workshops and training.
- And, Cyber Security Awareness training in accordance with the ISPS Code.

WHO WE ARE

Neptune P2P Group is an internationally renowned private security company offering security risk management and maritime security. It is owned and operated by former British special military unit officers and operators. Established in 2009 "Prevention by Protection" is at our core, supporting clients in both maritime and land-based risk management with its highly experienced team, industry knowledge, proprietary technology, and agility.

OUR MISSION

Neptune P2P Group's mission is to safeguard business operations, their people, their assets, and their reputation worldwide within unfamiliar, semi-permissive and high-risk maritime and land-based environments.

WHY USE NEPTUNE P2P GROUP?

Notwithstanding our significant experience – we have delivered over 8500 successful security tasks over the past decade, Neptune P2P Group's competitive advantages are we care about the service we deliver, and we provide bespoke solutions. Our client stakeholder centric approach ensures that you not only get what you want, but a security solution based on international best practice adapted to your needs. Client satisfaction is our guarantee.

OUR UNIQUE SELLING POINTS

Neptune are the thought leaders in security risk consultancy: moving beyond the likes of the ISPS Code with international best practice through Security Convergence and Digital Integration. We have the Strategic knowledge and reach coupled with the on ground tactical experience others crave for rather than consultancies based on academic theories – we've either lived the risk or in previous careers, created it. Our standards are high and we care. We are client centric – we deliver what you actually require rather than off the shelf solutions – we are bespoke to your needs. All we ask is for one contact so we can demonstrate our unique and professional services.

COMPLIANCE ACCREDITATION

Neptune P2P Group is certified to the following international standards: ISO9001 (Quality Management Systems), ISO 14001 (Environmental Management Systems), ISO45001 (Occupational H&S Management Systems), ISO28000 (Supply Chain Management Systems), ISO28007 (Maritime Security Management Systems) and employs the principles of ISO31000 (Risk Management), ISO28000:2022 (Security and Resilience -Security Management Systems), and ISO 22301 (Security and Resilience - Business Continuity Management Systems), ISO 31030:2021 (Managing Travel Risks), and BS11200 (Crisis Management). We also hold Cyber Essentials Plus certification.
