

MARKET ENTRY AND MISSION ENABLEMENT

RISK ADVISORY SERVICES

Neptune's Risk Advisory Services span the land and maritime domains and consist of:

- **Market Entry – Mission Enablement.** Shrewd companies transfer security risk to security professionals. Neptune P2P provides market-entry mission enablement globally on behalf of their clients. This is a package of particular use to the Energy Services, including the Oil and Gas Industry, but can be utilised much wider too, such as safeguarding your office, base, or routine movement. Our role is to enable clients to operate in challenging environments while also meeting their employee safety duty of care obligations.
- **Established facilities.** Our services range from complex facilities such as onshore and offshore Energy Installations, Ports and Terminals, and large and culturally sensitive venues, to less complex offices within a tower. The principles remain the same. Our stakeholder centric approach sees us collaborate to confirm the company's assets (generally people, infrastructure, equipment, information, processes, and reputation) then through a risk management pathway, we identify the risk and develop control-measure recommendations to mitigate it. This includes organisational design where Security Convergence is essential.
- **Business Continuity and Resilience (BCR).** We assist organisations in confirming their critical assets, understanding potential disruptions (particularly to their supply chain), and develop contingency plans. We offer extended security risk management, external validation of physical security control-measures, and Cyber Security Awareness, ensuring business continuity.
- **Travel Risk Management (TRM).** People are often quoted as an organisation's most critical asset. Moreover, organisations are legally and morally obligated to provide a reasonable duty of care for their employees when travelling. Nonetheless, employees visiting unfamiliar and sometimes dangerous locations are often overlooked. Neptune P2P Group provide end-to-end support from: market entry and mission enablement; TRM Strategy, policy and procedures; security intelligence reports; training (accredited SAFE, HEAT and Crisis Management); and a Travel Risk Management app to monitor, alert, and respond; emergency/crisis management; and air, land, sea-based, and combined evacuations. Neptune's TRM service is aligned with ISO 31030 (Managing Travel Risk).
- **Crisis Management and Emergency Response:** We offer procedures, training, and support for Crisis Management and Emergency Response, complementing BCR and TRM, through our 24/7/365 Operations Centre. We employ highly trained personnel, including UK National-level Law Enforcement Hostage Negotiators, who provide real-time assistance in various situations worldwide.

WHO WE ARE

Neptune P2P Group is an internationally renowned private security company offering security risk management and maritime security. It is owned and operated by former British special military unit officers and operators. Established in 2009 "Prevention by Protection" is at our core, supporting clients in both maritime and land-based risk management with its highly experienced team, industry knowledge, proprietary technology, and agility.

OUR MISSION

Neptune P2P Group's mission is to safeguard business operations, their people, their assets, and their reputation worldwide within unfamiliar, semi-permissive and high-risk maritime and land-based environments.

WHY USE NEPTUNE P2P GROUP?

Neptune are the thought leaders in security risk consultancy: moving beyond the likes of the ISPS Code and ISO 31000 with wider international best practice, and a blend of knowledge and experience. We have strategic knowledge and reach coupled with the on ground tactical experience others crave for rather than consultancies solely based on academic theories. Our standards are high and we care. We are client centric – we deliver what you actually require rather than off the shelf solutions – we are bespoke to your needs.

COMPLIANCE ACCREDITATION

Neptune P2P Group is certified to the following international standards: ISO9001 (Quality Management Systems), ISO 14001 (Environmental Management Systems), ISO45001 (Occupational H&S Management Systems), ISO28000 (Supply Chain Management Systems), ISO28007 (Maritime Security Management Systems) and employs the principles of ISO31000 (Risk Management), ISO28000:2022 (Security and Resilience -Security Management Systems), and ISO 22301 (Security and Resilience - Business Continuity Management Systems), ISO 31030:2021 (Managing Travel Risks), and BS11200 (Crisis Management). We also hold Cyber Essentials Plus certification.
